

CORPORATE SOCIAL RESPONSIBILITY

Environmentally friendly business

Saigon Van invests in environmentally friendly business practices. The moving company has taken several measures in the area of environment. These measures protect the environment while providing cost advantage.

Vehicle fleet

Saigon Van uses vehicles that meet the Euro 4 standard. The purchase of these vehicles is chosen over the possibility of providing the existing Euro 3 vehicles with a particulate filter. Besides the fact that the vehicles are less harmful to the environment, Saigon Van will profit from differentiated tolls for cleaner trucks in international transport and this will enable Saigon Van to provide lower prices for our clients. The vehicle upgrade to Euro 4 makes it possible to reduce emissions in cities that use the Euro standard.

Durable work-wear

Saigon Van has selected **Hong Dinh** as a supplier of work clothing for the CSR policy. In addition to an internal CSR policy, this provider also has an external CSR policy. When purchasing clothing attention is paid to the environmental impact of production and working conditions for factory workers.

A code of conduct will be used for working conditions of factory workers. The code is based on the labor standards has set. This is done according to the methods of the Foundation Fair Wear Foundation (FWF). In addition to these social requirements for the purchased clothing, are also made demands for the environmental impact in the production of clothing.

Recycling packing materials

Saigon Van has selected **Phuong Nam** as a supplier of packing material for the CSR policy. Their material to produce recycled packing material. To ensure our packing material is eco-friendly, we inspect and approve the post-industrial recycled paper and cardboard from this supplier and they source FSC-certified material from sustainably managed forests.
